THE STORY of the development of the "Standard" Built-in plumbing industry. Almost from the time we started making

We wanted a fixture combining service and beauty-we wanted to eliminate tub feet so that the tub could rest directly on the floor. Only in this way could the useless space between floor and bottom of tub be avoided. We made almost 3,000,000 bath tubs before we achieved our ambition. The result is the line of beautiful "Standard" Built-in Baths awaiting your inspection in our showroom

Anent the hat, the newest thing in a sport hat is one covered with fine, thin rubber. Kid hats and leather hats of various grains have come and gone, and now the quest for the unusual brings in its wake rubber.

The quality is so fine that only the feel of it or the faint odor reveals the secret, for on a trotting horse, or, more appropriately, a trotting girl, it looks for all the world like taffeta silk.

A visitor to Washington wore one the other day which was of a lovely shade of turquoise blue, the tall crown and the upper side of the medium brim being covered with the blue rubber, the brim itself being of a soft shade of maize, a narrow edge of the upper side of the brim.

Around the crown are embroidered gay little birds whose plumage reproduces the two shades of the hat and one or two other complimentary colors in soft pastel shades.

The hat, which was taken off for inspection, was found to be as pretty inside as out, for the lining was of maize taffets the same color as the straw brim, of which it seemed but the continuation.

Cambon was for France, and there, with a table set amid roses and old-fashioned perennials, the two diplomatists sat over their breakfast and discussed secrets, political and so-cial, that would make more than interesting reading today.

It was with regret that many Washingtonians saw the garden wall come down, followed later by the walls of the historic old mansion, which fell to be replaced by a modern, up-to-date and what has been called the only real French apartment house in Washing-ton.

The old house on the Annapolis-Washington road, was the scene of much hospitality, and one of its famous visitors was George Washington, whose bed there is still preserved as a treasure. Besides the beautiful paneling and elaborately carved mantels and cupboards, the old place is chiefly lovely today for its box-hedged garden, the old English box being very tall and making cool and shady the graveled walks even on the hottest days.
